Session Ideas:

- The Unconference will host [David Coleman's Collaboratory Experiment](#)
- [Susan Scrupsk](#) and [Dr. Keri Pearlson](#) will conduct an open, interactive session on "Barriers to Adoption."
(NOTE:this session happened at the unconference...see the conversation [here](#) with some of the notes from the session)
- [David Terrar](#) will present the workshop [Building Better Web Communities — The ICAEW Case Study](#)
- [Hisham El-Emam](#) will present the workshop Open Source Office — When is the time to release source code to the public?
- [Dr. Keri Pearlson](#) (possibly with Dr. Nick Vitalari) can facilitate a discussion on the "future of employee computing". We'd like to present thoughts on our vision and hear others discuss their vision for the "desktop" and environment for large enterprises. This is a "10,000 ft level" discussion, not a detailed "tools and technology" discussion.
- Henry Hon can facilitate a discussion on Web 2.0 applications in e-learning and corporate training.
- Please add your session ideas above
