

MyBooo

About MyBooo: MyBooo is cloud computing for dummies. Our goal is to merge local and online applications through an easy to use Web platform. We provide a web desktop including all the tools you need to work: mail, agenda, contact, sharing, RSS, word, excel and so on. This desktop is synced with your main PC and reachable through any mobile. Modifications made either online or from your mobile appear automatically on your local desktop and vice-versa. So MyBooo is a packaged solution providing to independent and SMBs extranet, back up and virtualization for a monthly subscription. Please visit www.mybooo.com for more information.
